

Tortora Silcox Family Foundation 45 Credit initiative—Graduation Tracking Graphs

April 7, 2015

Definitions:

Cohort: A cohort includes all students who have just earned 45 credits as of the previous semester. Students coming into the cohort semester who had earned 45 or more credits before the start of the previous semester are not included. The major of the student in the cohort semester determines the Council into which a student is tracked.

Council: A council has responsibility for a group of majors. Students in those majors are assigned to the appropriate council and tracked.

Num. 45 Cr Schols: Students who receive a non-governmental scholarship in their cohort semester are counted. Students within the cohort who did not receive a scholarship in the cohort semester, but may have received one in an earlier or later semester were not counted. All scholarships were included, not just those titled “45 credit.”

Graduation after Sem X: If a student’s graduation date is the end of either session of the cohort semester, the student is counted in Grad After Sem 1. If the graduation date is in the semester following, then only Grad After Sem 2 is incremented. The numbers are cumulative. The rate is the graduation rate of the 45 credit-reaching cohort on that line.

Transfer After Graduation: Only students who graduated and who transferred to four-year colleges were included. No cohort has more than six elapsed years from graduation. All four-year colleges were included, not just CUNY.

Rate of Transfer After Graduation: This is the number who transferred after graduation divided by the total number of graduates.
